

# Hurricane Dorian Update

September 6, 2019 12:00 EST

Updates will be posted at: [www.trimac.com/hurricane-dorian](http://www.trimac.com/hurricane-dorian)

---

## Overview:

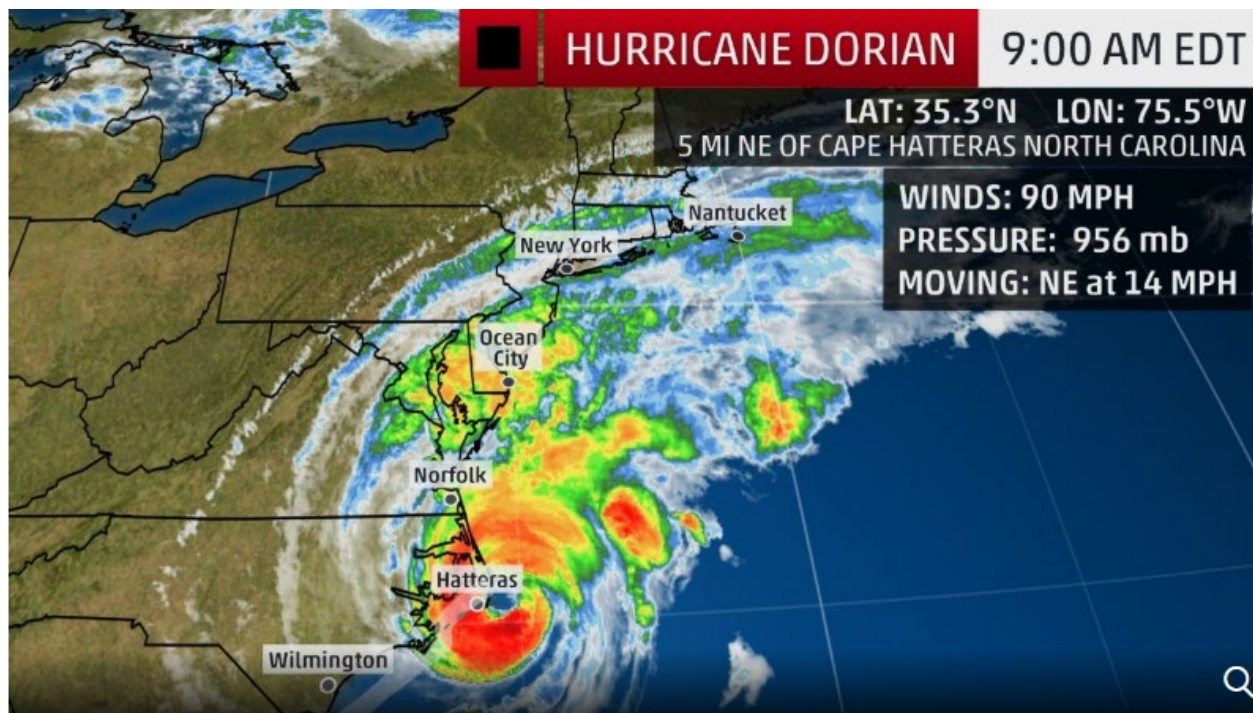

The eye of Dorian is passing just east of Cape Lookout, North Carolina, placing the area around Morehead City, Atlantic Beach, Cedar Island and Ocracoke Island in the hurricane's eyewall, containing the strongest winds.

Cape Lookout, North Carolina, reported one-minute sustained winds of 81 mph, with a gust to 94 mph early Friday morning, according to the National Hurricane Center. The eyewall will then hammer at least parts of North Carolina's Outer Banks.

Gusty winds toppled trees, triggering scattered power outages in Edgecombe County, North Carolina. Tropical-storm-force winds (39-plus mph) extend up to 220 miles from the center, while hurricane-force winds (74-plus mph) extend up to 45 miles from the center.

For the most recent information, visit the National Hurricane Center web site:
